T35 P Peel

T35P Peel

Trichloroacetic Acid
Kojic Acid
Arbutin
Hydrogen Peroxide

T35P - MCCM is an innovative peeling developed by Mesosystem, which does not affect the surface layer of the skin, and therefore does not require a long recovery period. Based on the intensity of exposure to the skin, it refers to the median peels.

Benefits

Due to T35P® unique composition, the solution acts very quickly, almost instantly, penetrates the dermis, activates all the skin regeneration and renewal without harming the epidermis.

This means it does not only remove the toughened skin, but also penetrates deep inside, acts on the epidermal skin layer down to the basal layer, stimulating it to actively renew and regenerate.

Composition

T35P® IS AN UPGRADED FORMULA OF TRICHLOROACETIC ACID (TCA).

Each molecule of T35P has unique combination of 35% TCA, Hydrogen Peroxide [H₂O₂], that helps neutralise the TCA effects (therefore, there's no need to neutralise), adding the benefits of the Kojic Acid [C₆H₆O₄] and Arbutin [C₁₂H₁₆O₇]

. **Trichloroacetic Acid 35%** - a chemical peel that is widely used in medium depth, because it transcends the epidermis and reaches the superficial dermis, achieving great results in this depth of peeling. Usually has very good results in more subtle and superficial imperfections, such as wrinkles and dilated pores.

. **Hydrogen Peroxide** – it reaches the papillary dermis and going through the superficial layers of the skin, the H₂O₂ reduces the aggressive effect of hydrogen ions of TCA (H⁺), preventing the denaturing of the corneal layer and water release.

In low concentration, it has several other important effects in the dermis: it improves the fibroblast activity, regulates the activity of lymphocytes and the inflammation caused by TCA7.

Composition

- . **Kojic acid** - The main goal of this component is the skin whitening. The chemical composition of this acid suppresses the melanin production. In the past, it was used to eliminate pigmentation, freckles, remove post-acne spots, and scars.
- . **Arbutin** - It is a substance derived and naturally found in plants such as Bearberry, cranberries, blueberries, wheat and pears. Our body decompose Arbutin into glucose and hydroquinone. Arbutin is a natural 'cousin' of synthetic hydroquinone. It's a very good alternative to hydroquinone for the treatment of various types of pigmentation and hyperpigmentation spots.

TCA + Hydrogen Peroxide + Kojic Acid + Arbutin

Products for the treatment

NECESSARY PRODUCTS

- 1 . MCCM Cleansing Milk / Limpiador 2&1 MCCM
- 2 . MCCM Facial Tonic
- 3 . Cleansing Solution
- 4 . **T35P Pelling Solution**
- 5 . Argireline Cream
- 6 . Sun Cream SPF 50+

INDICATIONS - T35P USAGE

HEALING

MILD ACNE

STRETCH MARKS

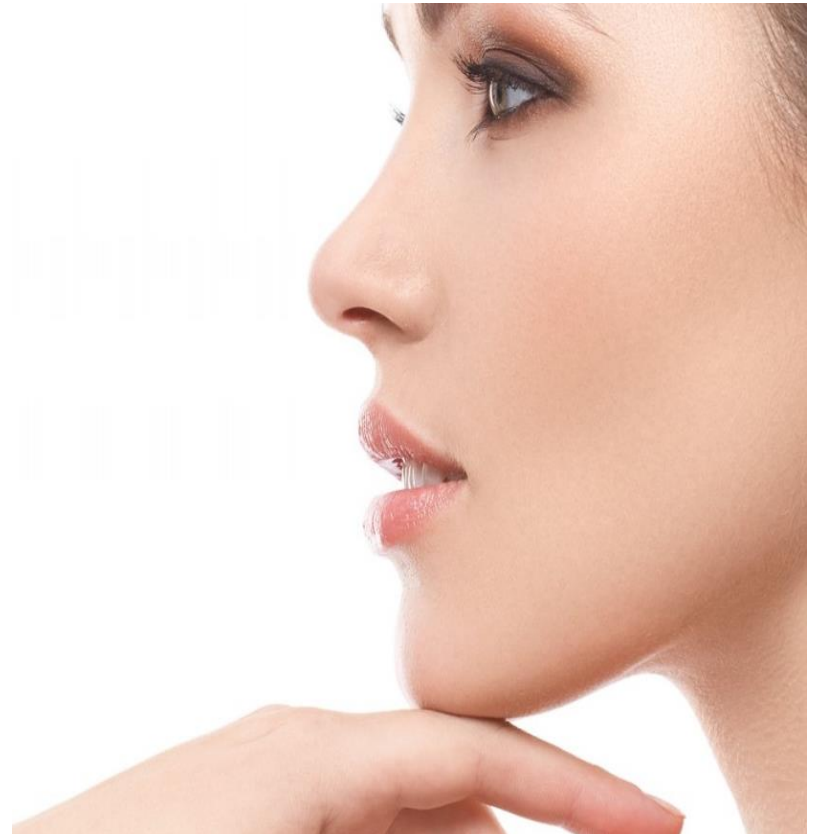

FIRMING

ANTIAGING

HYPERPIGMENTATION

T35P ADVANTAGES

- **PAINLESS PROCEDURE**
- **ABSENCE OF REHABILITATION PERIOD** (there is no skin flaking, oedema)
- **NO AGE RESTRICTIONS**
- **SUITABLE FOR ALL SKIN TYPES**
- **AVAILABLE ALL THE YEAR** (it is not necessary to wait for the cold season or reduced solar activity)
- Results from the first session onwards, persisting for a long period of time
- **THE SKIN DOES NOT BECOME PHOTSENSITIVE AFTER THE PROCEDURE**

T35P EFFECTS

- Deep layer of the **dermis compaction and toning** (due to that the oval shape face will have a more precise contour)

- Normalization of sebaceous glands and significant reduction of the pores - the gloss disappears

- **LIFTING** - a kind of an easy pull-up effect

- **Strengthening** the effects of the injection procedures

- **Skin Whitening** (significant reduction in all types of pigmentation and freckles)

- **Photoaging** – effective treatment

- **Tone and face shape alignment** (the skin becomes fresher, acne spots, and all type of scars tend to disappear)

After one session

BEFORE

AFTER

Application

STEP-BY-STEP

1st Step: cleansing with MCCM's Cleansing milk

2nd Step: toning with MCCM Facial Tonic

3rd Step: apply the Cleansing Solution with a gauze across the face

4th Step: apply the T35P through zones making a lifting massage (emphasizing more in the wrinkles) until total absorption; apply it again and make the massage once more. 3 or 4 application should be made per each zone.

5th Step: apply the Argireline Cream and the Sun Cream SPF 50+

Homecare Recommendation: Argireline Cream and Sun Cream SPF 50+
