Product **CONCENTRATE LINE**
Instant Beauty Flash

Format   20 ml. dropper

Description Concentrate with immediate tightening and anti-fatigue effect

Reference 08100020

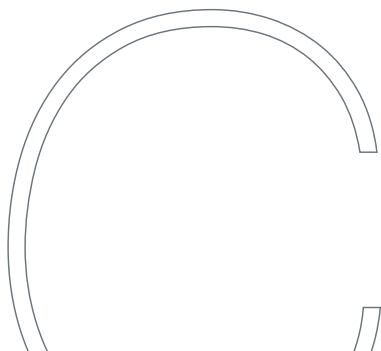

Main active ingredients

Osilift®	Natural tensor ingredient, derived from oats. It forms a three-dimensional network that extends and adheres strongly to the skin in a prolonged way, forming a continuous and cohesive tensor film. It does not leave any shine or sticky sensation. It has immediate tightening properties and a powerful anti-wrinkle effect if applied daily.
Hidromanyl®	Active ingredient of vegetable origin and with hydrating effect. It has repairing properties of the stratum corneum and an immediate and lasting moisturizing effect. Smoothes the skin.
Hydrotriticum PVP®	Copolymer, film-forming agent. Tensor of the skin, it has protective and moisturizing properties due to its capacity to retain water.
Excel Mica JP2	Soft Focus effect, pigments that reflect light and soften small skin imperfections, while attenuating signs of fatigue and age. They enhance the skin's natural tone, leaving it radiant and luminous.

Skin Type	Results
Indicated for all skin types that require, instantaneously, soften expression lines, attenuate signs of fatigue or an immediate lifting effect. Very suitable for fixing and enhancing makeup.	Diminishes signs of tiredness and fatigue. Tensor and revitalizing concentrate with immediate and prolonged effect. Vitality and luminosity. Dissipates wrinkles and the skin is firmer and with an instant good-looking appearance.

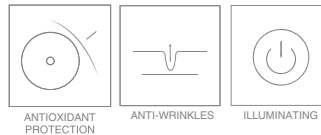

How to use	Appliances	Frequency of use	Contraindications
<ul style="list-style-type: none"> On clean skin, apply 4 or 5 drops of the product to face and neck with a light massage until completely absorbed. Wait a few minutes before applying makeup or the usual moisturizer. Daily use treatment. 	Not required.	<ul style="list-style-type: none"> Home use: On special occasions, as a revitalizing effect and immediate flash. Daily use for anti-wrinkle and firming lifting treatment. Professional use: Every time the professional requires it. 	Not described.

Technical sheet

Product CONCENTRATE LINE
Ferulic
Vit C + DMAE

Format

20 ml. dropper

Description Concentrate with antioxidant and anti-aging effect

Reference

08120020

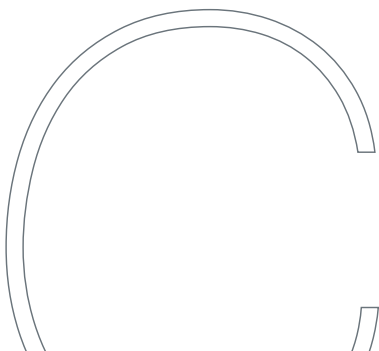

Main active ingredients

Ferulic Acid	Natural antioxidant of vegetable origin that can be extracted from blackberries and olives. Its main function is to act as an antioxidant, preventing cellular aging. In addition, it is highly effective in slowing the deterioration of the skin caused by sun exposure.
Ascorbic Acid	Pure Vitamin C. A key factor for collagen synthesis, it neutralizes free radicals, fighting oxidative stress (antioxidant) and helping to redensify tissues. Increases collagen synthesis. Helps to reduce skin hyperpigmentation.
DMAE	Antioxidant and anti-aging active ingredient. It is characterized by providing an important firming and toning action that improves the firmness of the skin. It has an immediate action that improves the appearance of sagging skin. Provides an instant lifting effect and provides hydration and protection against free radicals.

Skin type	Results
Indicated for all skin types from 30 years or with signs of premature aging. Especially for skin hyperpigmented or aged by sun exposure.	Enhances collagen synthesis resulting in smoother and firmer skin. Restores skin's firmness, tone and luminosity. Prevents the appearance of spots and protects the skin from free radicals.

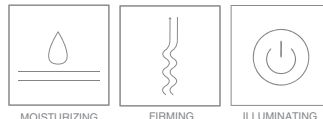

How to use	Appliances	Frequency of use	Contraindications
<ul style="list-style-type: none"> On clean skin, apply 4 or 5 drops of the product to face and neck with a light massage until completely absorbed. Wait a few minutes before applying makeup or the usual moisturizer. 	Not required.	<ul style="list-style-type: none"> Home use: Morning and/or evening. Daily use treatment. Professional use: Every time it is required, especially in antioxidant and anti-aging treatments. 	Not described.

Product **CONCENTRATE LINE**
Proteoglycans
HA + Vit C

Format   20 ml. dropper

Description Firming and illuminating Concentrate

Reference 08110020

Main active ingredients

Proteoglycans Maintain the cutaneous hydration and favors the anchorage of the collagen fibers allowing the elasticity of the skin. They immediately moisturize the skin and maintain its hydration throughout the day. Provide firmness to the skin, while helping provide luminosity and good appearance.

Ascorbic Acid Pure Vitamin C. A key factor for collagen synthesis, it neutralizes free radicals, fighting oxidative stress (antioxidant) and helping to redensify tissues. Increases collagen synthesis. Helps to reduce skin hyperpigmentation.

Hyaluronic Acid Low molecular weight. It has a high capacity to absorb water. It is capable of penetrating the skin creating hydration reserves in the superficial layers. It favours the opening of skin channels, allowing other molecules with less penetration power to penetrate the skin. Wrinkle filler and repairer.

Skin type	Results
Suitable for all skin types, especially for dehydrated and dull skin, or with the first signs of aging.	Hydrates immediately and all day long. Provides luminosity, elasticity and firmness to the skin, while helping to eliminate expression lines and wrinkles.

How to use	Appliances	Frequency of use	Contraindications
<ul style="list-style-type: none"> On clean skin, apply 4 or 5 drops of the product to face and neck with a light massage until completely absorbed. Wait a few minutes before applying makeup or the usual moisturizer. 	Not required.	<ul style="list-style-type: none"> Home use: Morning and/or evening. Daily use treatment. Professional use: Every time it is required, especially in antioxidant and moisturizing treatments. 	Not described.
